

NARA Spring Conference 2019
Pre-Conference: Your Roadmap to PDPM
Tuesday, May 14th 1:00pm

In July 2018, CMS finalized a new case-mix classification model, the Patient Driven Payment Model (PDPM), effective beginning October 1, 2019. PDPM will be used under the Skilled Nursing Facility (SNF) Prospective Payment System (PPS) for classifying SNF patients in a covered Part A stay. During this pre-conference our expert panelists will address the timeline for implementation and questions and concerns all stakeholders have in preparing and being successful with PDPM implementation.

Course Objectives

1. Recognize key areas impacted by PDPM: ICD-10 Diagnosis coding, contracting language, SNF Provider, Therapy Provider, Interdisciplinary teams, QAPI, minutes/concurrent/group, and maintaining quality
2. Identify how skilled nursing facilities and therapy providers can share resources for implementation success
3. Discuss how software providers are preparing their systems to meet the needs of the end user to support PDPM
4. Analyze current operations to maintain quality outcomes
